A Closer Look

Department of Homeland Security, Transportation Security Agency

QED operates the Employee Parking Assistance Program by providing program management, enrollment processing, financial services, and call center operations for transportation and parking services in support of 50,000 TSA employees at 147 airports across the United States.

National Science Foundation, Artic Sciences Research Support Logistics Program

QED supports facilities management, logistics, engineering, financial management, and strategic planning and operations for 30 arctic labs utilized by 25+ nations, as well as data sharing with both the Department of Defense and the Intelligence Community. QED has successfully augmented NSF's arctic requirements under three contracts since 2017.

Department of Treasury, Bureau of Engraving & Printing

QED provides strategic operations and safety management in support of the 100-acre Western Currency Facility in Fort Worth, Texas. QED's onsite team provides health and safety services, industrial hygiene, risk assessments, site inspections, regulatory compliance, employee training, call center operations, and incident investigations for 1,850 Treasury employees.

Department of Labor, Employment & Training Administration Job Corps

QED streamlines and improves the cost-effectiveness of all facets of the Job Corps program. We employ research and data analysts to centralize and standardize policy and records management for 300,000 students at 121 Centers across all six Job Corps regions. We developed and implemented procedures to augment submission of 1.2 million pages of student documentation per NARA regulations.

National Science Foundation, Directorate for Geosciences

QED is guiding NSF GEO's efforts to evaluate existing practices and implement a comprehensive Knowledge Management program, complete with standardized processes and procedures aligned to management structures and supported by effective digital tools.

Department of Homeland Security, Transportation Security Agency, Real Estate Management Division

QED provides data collection, data entry, validation, reporting, and Real Estate Management System implementation support to enable improved real estate's financial management processes, resolve issues related to the lease reporting process, and provide accurate information for day-to-day management and financial reporting.

Defense Technology Security Administration

Top Secret Facility Clearance — QED provides courier delivery services of TS/SCI material between the Pentagon, DoD, Department of State, Department of Commerce, and 20 agencies and commands within the National Capital Region.

Department of Justice, Criminal Division

QED provided 25 HSPD-12, NACI-screened employees to provide 24/7 security operations, access control, and escort services for 300+ contractors during a 2-year renovation project of two FBI facilities in Washington, DC.
